EXPERIENCE

Web Development Contributor

May 2024 - Aug 2024

GirlScript

- Learned from real world experiences using HTML, CSS, and JavaScript.
- Implemented foreign APIs to enable seamless data integration and efficient communication between the front-end and back-end systems.

Full Stack Developer Intern

July 2025 - Present

Lit Amor

- Team lead for building core features of an upcoming dating-based social media platform.
- Implemented the point(XP) earning metrics and logic for single users, developed the chatting feature.
- Integrating the main app features built by my fellow co-workers and my team, to build the combined main features of the app.

PROJECTS

Expense Tracker This is an expense tracker where there are three tabs(dashboard,income & expense) and the users can keep a track of their daily income and expense with a final total balance([Try it here](#))

Notey A lightweight, responsive note taking application built with React and TypeScript that stores your tasks in localStorage. It supports writing in markdown format, can be installed as an application and also supports rich text writing.([Try it here](#))

Blogging Application This is a userfriendly and easy to use blog application, where you can view posts, make an account, create blogs, comment on other's blogs. Made using Spring boot and ReactJs ([Github Repo](#))

EXTRA-CURRICULAR ACTIVITIES

- Studying PostgreSQL, TypeScript and FastAPI
- Participated in **Hackentine Hackathon 2025 - Pair with code** with my team we qualified till the semi finals.
- Participated in the **Keptloy** fellowship, where we were taught about CI/CD pipelines, preparing test cases and how to test an application to its limits, to find bugs and probable improvements.
